

Real-time Thermal Body Temperature Measurement

Contact-less, Efficient, & Easy to Use

Micromax Health launches the latest thermal camera, which is capable of highly accurate body temperature measurements $\pm 0.3^{\circ}\text{C}$ (with blackbody). With a built-in AI algorithm for multi-person measurements up to 3m distance, enabling fast and non-contact access.

The cutting edge thermal measurement system provided by Micromax Health provides real time temperature readings in high flow traffic areas. With the need to screen incoming patients and health care providers at hospitals, this solution stops congestion, allows for social distancing — while still proving highly accurate results.

The system is easy to manage with greatly reduced staff numbers. This allows valuable nurses and other health care professionals to be used where they can be more effective.

Solution

Application Scenario

Emergency Departments

Aged Care Facilities

Hospital Waiting Rooms

High Risk Work Areas

Product Recommendation

DH-TPC-BF3221-T + JQ-D70Z
 Thermal: 256*192, 7mm
 Visible: 2MP, 8mm
 White light and loudspeaker alarm
 Temperature accuracy $\pm 0.3^{\circ}\text{C}$
 (with blackbody)

DHI-IVSS7008-1I
 TPC alarm event linkage
 Statistical report and export
 8 channels mask detection
 8 channels face recognition

DHI-NVR5216-16P-I
 TPC alarm event linkage
 Statistical report and export
 4 channels mask detection
 4 channels face recognition

DSS Express/Pro
 Unified TPC device management
 Real-time temperature display
 Rich alarm linkage for TPC events
 Multiple clients login
