

Covid-19 Solutions: Screen One

The individual thermal screening solution is used to quickly alert staff to any visitors that are showing elevated temperature readings. It can easily be set-up upon entry to the premises or specific rooms. And the device will reduce the need for staff to monitor people manually.

PRODUCT EXAMPLES:

SCREEN ONE FEATURES:

- Contactless efficient temperature screening
- Ability to measure temperatures on masked and unmasked visitors
- Voice alarm for elevated temperatures
- Stand-alone terminals
- Ability to support area control e.g. security door systems
- Fast and accurate facial recognition capability 99%+
- Integrated facial recognition features customisable by user.

PRODUCT BENEFITS:

- Easy and simple setup, works right out of the box
- Keep staff and visitors safe with touch-free and accurate temperature measurement
- Operate with minimal demand on staff
- Helps you comply with Covid-19 guidelines and SafeWork principles
- Be prepared to provide vital transmission tracing information
- Maintain trust with patients and provide peace of mind
- Reduce costs of using staff to perform safety orientated tasks with a cost effective solution.
